About Me

Systems engineer in process, technology lover with solid skills in web development. My reserved approach is combined with a passion for solving complex problems. Experienced in data analysis. Looking to contribute to innovative projects where I can apply my dedication to detail and commitment to continuous learning.

Education

Information Systems Analysis & Development

SERVICIO NACIONAL DE ARENDIZAJE | SENA 2017 - 2020

- Cumulative GPA: 4.5/5.0

- Internship in a company where I acquired a lot of knowledge in server management and web development.

Systems Engineering

CUC University - Universidad de La Costa 2021 - Current

Systems Engineering student, with a focus on web development and database management. Academic experience in the creation of web applications and optimisation of information systems.

Experience

Software Developer Jr

2019 - 2020

Soluciona Ingeniería Integral Sas

- Administration of web servers with NGINX and Apache.
- Creation and maintenance of a REST API using NodeJs Fastify and use of WebSockets.
- Version control using Git.
- Administration and creation of SQL and NoSQL databases.

Experience in developing web applications using Angular and NativeScript using forms and UX and UI designs.

Software Developer

2021- 2023

Intra Click

Systems Analyst and Developer of dynamic web applications.

- I implemented OAuth and role management on a web page using the JWT library, ensuring secure and efficient authentication.
- I implemented Firebase for social network authentication and message verification for phone number authentication, improving the security and accessibility of the system.
- I managed instances on AWS Lightsail with Ubuntu also making use of RDS for databases and S3 for storage, optimising performance and scalability of resources.
- I developed a RestAPI using NodeJS with NestJS, ensuring an efficient and modular service.
- I developed a website using React and NextJS, following a Figma mockup to achieve an optimised and modern user experience.
- I implemented MapBox to add markers and manage sites on the map, improving interaction and geographic visualisation.
- I used Git for repository management, ensuring version control and project collaboration.
- Assist in the maintenance and use of Droplets at Digital Ocean to instantiate servers.
- Assist with requirements gathering for applications under development.

My effective communication skills and my ability to collaborate in multidisciplinary teams, committed to delivering innovative and efficient technological solutions, also stand out.

TECHNICAL COMPETENCIES

- **Cloud** : AWS, DIGITAL OCEAN
- **Languages** : JavaScript, Bash
- **OS** : Debian, Ubuntu
